

Bred for Excellence

JYJ Red Angus Production Sale

Saturday, November 4, 2023 • 1 pm CDT • Columbia, AL

Fall Calving Pairs • Bred & Open Yearling Heifers • Spring Calving Bred Females
Registered Red Angus Bulls • Spring Calving Commercial Red Angus Bred Heifers

Welcome to JYJ Red Angus.

We are excited to welcome you to our first-ever production sale! We have spent much time and many years planning, praying, and preparing for this time — and here we are! With much enthusiasm for the cattle industry, we are delighted to have you join us for some good 'ole southern-style food, sweet fellowship amongst neighbors and friends, and the bond that brings us all together — cows, better yet, Red Angus cows. So, thank you for your interest in the Red Angus breed and our operation. It has been our desire to help build and promote this incredible breed in the Southeast United States for quite some time. We are in a climate that is very appropriate for the red-hided, heat-tolerate, easy- fleshing Red Angus cattle.

I became very interested in the Red Angus breed 23 years ago when I visited R.A. Brown Ranch in Throckmorton, Texas. As a result, I bought my first Red Angus bulls and set out to transform a very hodge-podge herd of commercial cattle into a very impressive, uniform, highly marketable calf crop. After graduating from Abraham Baldwin Agricultural College, I returned to the family farm with a passion to rebuild the farm's cowherd, and in just a few years was able to utilize breed-leading Red Angus genetics to do just that: Produce and market outstanding feeder cattle, and make replacement females that grew into a productive and prolific red cowherd.

When I married my wife, Jessica, we knew we wanted to contribute to the well-established, family operation, Yance Farms, Inc., built by my grandfather, Clarence Yance, and my father, Terry Yance. With their blessing and support, along with the mentorship of Donnell Brown from R.A. Brown Ranch, we began our journey into the Red Angus seedstock business as JYJ Red Angus, LLC. Jessica and I married in March of 2006 and purchased our first Red Angus females in October of that same year. Which is also when the Brown Family invited us to join their cooperator team. Today, 17 years later, we're more committed than ever to produce and market superior Red Angus genetics through the biannual sales in Throckmorton, Texas. Our commercial cattle afforded a herd that could serve as recipient cows and by the spring of 2007 we were busy utilizing artificial insemination and embryo transfer to mass-multiply some of the elite matings in the breed to rapidly grow both our spring and fall calving registered cow herds.

While the majority of our spring or fall born bulls travel almost 1,000 miles to be feed efficiency tested, developed and marketed in Texas, that's not a feasible marketing plan for the rest of our seedstock cattle. The growth of our herd over these 17 years has created the need to better manage our grass, cattle inventory and our time. That's what led us to share our program through our first production sale. I have been actively involved with both the Red Angus Association of America (RAAA) as well as the Southeast Red Angus Association and have worked to promote Red Angus and advocate for the beef industry as a national director of the RAAA, member of our Southeast Red Angus affiliate and member and former officer of the Alabama Cattlemen's Association. I also work as a beef cattle specialist for, Premier Select Sires. My positions with these various organizations have provided multiple opportunities to interact with the beef industry and, specifically, cow-calf producers on both a state and national level. It has been very rewarding to watch the incredible growth that Red Angus has enjoyed across the country in terms of feeder calf value and, especially, with the popularity of the Red Angus mother cow.

Over the past two decades, this breed has been the fastest-growing breed in the country, and it's future looks even brighter. Our commercial cow-calf origin ensures we've walked many a mile in our customers' shoes, and that still guides many selection decisions in our Red Angus seedstock program. We understand the desire for market topping post-weaning traits such as marbling and feed efficiency, but also understand that cannot be achieved at the expense of cowherd fertility, productivity and longevity. Equally important, they need to be easy fleshing, quick to shed hair, have docile temperaments and come with feet, legs and udders built to last. We strive to produce and offer trouble-free cattle that do many things well to help sustain the profitability of our customers' cow-calf operations.

It has been with many sleepless nights and more prayers that I can count, we feel like the good Lord above has led us here to share a piece of the pie with our great neighbors and fellow cattle producers that work to sustain our farms, families, beef industry and our great nation. We know you will love the Red Angus cattle and fellow breeders just as much as we do. So, many thanks to you for your interest, your support, and your passion. Take a look at this offering, plan to join us on sale day, and enjoy a good time in the southernmost part of Alabama!

Sincerely,
Jim Yance

Jessica, Jim, Reid and Tye Yance

Tye (12) and Reid (8) are up-and-coming 4th generation ranch kids who enjoy their life on the ranch; they enjoy raising chickens, goats, ducks, dogs and bottle-fed calves. Scarlet is their favorite "pet" heifer.

Bred for Excellence

JYJ Red Angus Production Sale

Saturday, November 4, 2023 • 1 pm CDT • Columbia, AL

**Fall Calving Pairs • Bred & Open Yearling Heifers • Spring Calving Bred Females
Registered Red Angus Bulls • Spring Calving Commercial Red Angus Bred Heifers**

34%	48%	3%	3%	2%	34%	30%	15%	39%	72%	9%	34%	8%	19%

Feed:Gain (F:G)

EPD that predicts differences in the amount of feed an animal's progeny will consume to produce one pound of gain. EXAMPLE:

Bull A = -.50 F:G EPD

Bull B = 0.0 F:G EPD

We'd expect Bull A's progeny to consume 1/2 pound less feed per pound of gain.

• Sells with Heifer Calf #L642 born 9/4/23 (Reg 4812797) sired by Bieber JumpStart J137, the \$185,000 high selling Red Angus bull from the 2022 sale season.

FERT (Cow Fertility)

Predicts differences in the number of calves produced by bulls' daughters by the time they reach the age of 8 years.

Daughters from a bull with a 2.0 FERT EPD would be expected to produce on average - one more calf by the time they reach 8 years of age than daughters from a bull with a 1.0 FERT EPD.

\$Profit - Nearly every trait that impacts profit.

Revenue Traits:

- Calving Ease = More Calves
- Weaning & Yearling EPD = More pay-weight
- Days to Conception = more lbs and more calves
- Carcass Weight = worth more up to 1050 lbs.
- Marbling = valued based on grid premiums
- Ribeye area = value as impacts Yield Grade
- % Retail Product = more yield is more meat

Cost Traits:

- Cow Mature Size = in general, bigger eats more
- Cow intake = increased feed intake/increased costs
- Feed Efficiency = cost of Gain
- Carcass Weight = worth less over 1050 lbs.
- Marbling = valued based on grid premiums

\$Ranch - Cow/Calf Profit Index for producers who sell calves at weaning and want to optimize pounds of calf produced per acre.

\$Feeder - Post-weaning Index includes traits that impact profitability in the growing, finishing and carcass phases of the beef supply chain.

GridMaster - Newly formulated Red Angus Index that Predicts profitability in the feedlot and carcass phases.

Calf/Breeding Information

- Breeding information for spring calving cows and/or bred heifers.
- Calf information for Fall Calving Cows.

ONLINE BIDDING

DVAuction

Broadcasting Real-Time Auctions

Never Miss An Auction Again!
Watch & Bid online for FREE!

Can't make the sale?

Let DVAuction bring the sale to you!

Busy during the sale?

Let DVAuction represent your bid!

Visit www.dvauction.com and Register!

It's as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "create new account" tab
2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, at least 24 hours prior to the auction
3. Tune into the sale and make your purchases!

For General Questions Please Contact Our Office:
(402) 316-5460 or support@dvauction.com

*High Speed Internet Access Required

DELIVERY

- Purchases of \$15,000 or more will receive the first 1000 miles of delivery at no cost.
- Purchases of \$25,000 or more will receive free delivery to central points within the continental United States.
- For purchases less than \$15,000, JYJ will assist buyers in arranging delivery at the least possible cost.
- All animals will need to be picked up or delivered by 5:00 pm on Saturday, November 18th, unless prior arrangements are made with JYJ.

INSURANCE

- All animals are at purchasers' risk as soon as they are sold.
- Mortality Insurance will be available, ask for rates at the clerk's desk. Insurance can be purchased through Brad Wright/RanchHand Analytics when you make settlement for your purchases.

If Your Goal is Profit...Select for it!

Use the Selection Index that best fits your Operation

\$Profit

Developed for operations that raise their own replacements and retains ownership on steers and cull heifers, which are marketed on a Quality Based Grid.

\$Profit assumes a bull will sire 100 progeny over his useful lifespan.

\$Profit Combines all the traits that comprise both \$Ranch and \$Feeder to yield one number that predicts Ranchers' Bottom Lines.

\$Profit Example:

- Bull A has a \$Profit of \$15,000
- Bull B has a \$Profit of \$10,000
- = We would expect Bull "A" to produce an additional \$5000 of profit to the ranch over his service life (\$50 per calf x 100 calves) when compared to Bull "B".

Multi-generational use of \$Profit will move both \$Ranch and \$Feeder in a positive direction, just not as fast as the singular use of \$Ranch or \$Feeder.

\$Ranch

Developed for cow/calf producers who retain their own replacements and market 100% of the steer calves and cull heifers after weaning.

Traits included in \$Ranch:

Fertility, Milk, Weaning Growth, Cow Herd Feed Intake and Mature Cow Size

\$Ranch Example:

- Bull A has a \$Ranch of \$80
- Bull B has a \$Ranch of \$40
- = We would expect Bull "A" to produce \$40 per head increased profit when compared to bull "B" in a cow/calf operation that raised their own replacements and sold all other calves at weaning.

Multi-generational use of \$Ranch will ultimately result in: moderation in mature cow size, improved fertility, modest gains in weaning weight, improved stocking rates and ultimately - increased pounds of calf harvested per unit of feed/land resource.

\$Feeder

Developed to compare how bulls will impact profitability in the post-weaning phase (weaning to harvest).

Traits included in \$Feeder:

Feed Intake, Post-Weaning Gain, Carcass Weight, Quality Grade (Marbling), Yield Grade

\$Feeder Example:

- Bull A has a \$Feeder of \$100
- Bull B has a \$Feeder of \$150
- = We would expect calves sired by Bull "B" to earn \$50 per head increased profit between weaning and harvest when compared to calves sired by bull "A".

Use of \$Feeder in sire selection will maximize Feedlot Closeouts, but with no regard for the cow herd. Thus \$Feeder should be used by herds that purchase their replacement females.

PARAMOUNT

Elevate to a more valuable female.

For over a decade, Red Angus females have commanded more at auction than all other breeds, including Angus.

According to Superior Livestock data, Red Angus heifers brought nearly \$17/cwt more – that equates to a \$92/head premium on a weaned replacement female.

- Bred Nat. Serv. to BROWN CRSB MUSCOGEE H6615 Due 2/27/24, Fetal Sex - Bull.
- One of the many benefits of being an R.A. Brown Ranch cooperator is the dry matter intake data which plays a big role in the calculation of Feed Efficiency (F:G) EPD. Lot 7 predicts more pounds with less feed thanks to her Top 2/10 of 1% rank for F:G.

MINTRATE[®]

THE NUTRITIONAL FRAME WORK FOR BUILDING BETTER PERFORMANCE

Mintrate[®] supplies the perfect nutritional framework needed to build solid herd productivity for today and future generations.

- Unique combination of protein sources optimize rumen function
- Mineral technology factors in bioavailability, rumen solubility and interactions
- Supplies vitamins that forages lack
- Most formulations are fed free-choice
- Available in blocks, tubs and cubes/pellets

- Selling Choice of Lots 19A or 19B. Both sell open and ready to breed.
- We went to a great deal of effort to make these choice lots difficult, after all, we're going to move forward with the one you don't pick, so we need to be happy with either heifer. First up, is this pair of Cornerstone daughters - both out of 109 MPPA donors. Cornerstone has emerged as the Genuine son of choice who delivers big spread from CED to YW, Top 1% Marbling with more REA and better Yield Grade and Feed Efficiency than his deceased old man. If you want to make fast progress on multiple traits - your pick of these two heifers is a great place to start.

• **Selling Choice of Lots 20A or 20B. Both sell open and ready to breed.**

• If you came in 2nd place on the Lot 19 choice lot, don't fret. We thought the last two heifers were very evenly matched, but this time you've got to choose between full sisters. In addition to their 109 MPPA dam, Cornerstone brings a slew of amazing females from his side of the family. His dam, F8193 has a 113 average progeny weaning ratio. Her dam, 071Z maintains a 373 day calving interval and a 110 average progeny weaning ratio and is still going strong at age 11. 042Y, the dam of Merlin 018A has 10 natural and 8 ET calves to her credit and a 109 average progeny weaning ratio as a 12-year-old.

• Sells with Heifer Calf, # L641 born 10/5/23 (Reg 4812793) by BROWN CRSB MUSCOGEE H6615.

• Lot 64 is off to a great start with a 367 day calving interval after weaning her first calf at a 113 ratio. Top 1% Marbling and Feed Efficiency (F:G) indicate selling more PRIME carcasses while buying less feed.

New in 2023 FERTILITY EPD

The Fertility EPD (FERT) predicts differences in the calf crop percentage expected from a bull's daughters! High Fertility EPD bulls will build cow herds with consistently better breed back and deliver a higher percentage of calves to the weaning pen.

Higher Fertility also lowers cow herd culling requirements which reduces replacement rates; which in turn reduces cow herd depreciation costs and provides a larger percentage of the heifer calves that can be sold. As you would imagine, these more desirable outcomes drive HUGE differences in profitability, so the Fertility EPD has tremendous impact on \$Profit and \$Ranch.

The Sale Catalog Data Explanation on the top of page 4 shows where the FERT EPD is presented in the sale catalog. The example below is useful for better understanding the trait units and how to interpret variation in the FERT EPD values.

FERT EPD Example:

Bull A has a FERT EPD of 2.5

Bull B has a FERT EPD of 1.1
1.4

We would expect the daughters of Bull A to produce on average 1.4 more calves over their first 8 years of production than the daughters of Bull B.

• Lots 99 and 100 are 3/4 brothers; both trace three times to high accuracy Black Angus sires: Final Answer, Objective and Blue Moon (through Phenomenal). These are power bulls that should be used on 3-year-old (or older) cows where your goals are to increase weaning weight, post-weaning gain and carcass weight.

• The last bull in the sale is a superior cow herd builder, as indicated by his \$Ranch rank and supported by his superior values for heifer pregnancy and Fertility.

Thank you for your support of the Yance Family

Be safe getting home, and please see the delivery terms on page 4.

Commercial Red Angus Females:

How the JYJ Commercial Female Sale will work:

- Commercial Females were videoed at their respective ranch of origin prior to the sale. That video will be available for viewing prior to the sale along with the bull videos on DV Auction and at JYJRedAngus.com
- The winning bidder of any group of females will have the option of “rolling” any combination of groups within the same lot.
- The female lots include general descriptions of the cattle selling as well as delivery information.
- The Sale Day Supplement will have any updated palpation/ultrasound information and how that impacts the exact number of head in each lot.
- JYJ commercial females sell FOB Columbia, AL
- Kennamer commercial females sell FOB Hollywood, AL
- All commercial Females identified as “Bred” have been determined pregnant by a competent ultrasound or palpation technician
- If between sale time and December 31, 2023 you find one of these females sold as “bred” to be open. Please contact the seller (JYJ or Clay Kennamer) about an adjustment.
